Hi Josh

Costs below:

- Total spend on SH2 Napier to Wairoa, as at 31 March 2023: **$3,000,000**
- Estimated costs of the Bailey Bridge installation on SH2 Waikare Gorge: **$885,000** (please note this is a rough estimate)

Subject: MINO-709 RESPONSE RE: Wairoa Star query

Hi Josh

Please find our response below, apologies for the delay! As discussed, the costs will come to you separately.

1. **Bailey Bridge construction site in the Waikare Gorge**

Work is set to commence on installation of a single span, 39-42 metre Bailey bridge, over the Waikare Gorge on SH2 next week (all bridge components will be moved to the construction site this week). The team is anticipating the temporary bridge will be in place and the road re-opened with restrictions in early May, weather dependent.

Works required to install the bridge include pile installation for bridge supports, Mechanically Stabilised Earth (MSE) wall build, approach work on both sides including pavement works and Temporary Traffic Management (TTM) setup.

Waka Kotahi will be able to provide the spend to date on SH2 Napier to Wairoa corridor by end of tomorrow, with the following figures to follow by the end of the week:

- Spend to date on the Bailey bridge installation on SH2 Waikare Gorge
- Total estimated costs for the Bailey bridge installation on SH2 Waikare Gorge

In order to provide these, officials are required to manually review all invoices to identify the amount paid/charged for the investigation works, design, enabling ground works, substructure works etc.

SH2 Napier to Wairoa corridor is one of the most significant repair sites and it has not yet been fully assessed. Waka Kotahi is not in a position to have a final expected cost to reinstate this corridor until detailed damage assessments have all been completed.

2. **Update on the planned resealing works on SH38 between Wairoa and Lake Waikaremoana**

Due to the disruption to our network as a result of Cyclone Gabrielle, the planned reseal works on this stretch of road have been deferred until next construction season (summer 2023/24). It is important to cancel some planned renewals and maintenance works in the short term to ensure that this link remains open and able to deliver vital aid at this time.
