Dear Jo

Request made under the Official Information Act 1982

Thank you for your email of 13 April 2017 requesting the following information under the Official Information Act 1982:

.....*figures for the Waikato and nationally for the past three years on the following questions:*

- *How many town/ city signs been stolen/vandalised for the last three years? the green welcome signs*
- *Are there any signs that have been stolen/vandalised more than once? if so how many times?*
- *How much does has the NZTA spent on replacing/fixing signs due to being stolen or vandalised over the past three years?*

The tables below provide the information you have requested.

Please note that our response relates solely to state highways. For signs on local roads, you will need to contact each of the road controlling authorities responsible for those roads. A list of all local councils is available on the Local Government New Zealand website at: www.lgnz.co.nz/nzs-local-government/new-zealands-councils/.

If you would like to discuss this reply with the NZ Transport Agency (NZTA), please contact me by email at chris.young@nzta.govt.nz or by phone on (04) 894 6293.

Yours sincerely

Chris Young
National Manager, Network Directions and Performance

- **How many town/city signs been stolen/vandalised for the last three years? the green welcome signs.**

Vandalised signs

The following table A shows the cost of maintenance NZTA's contractors carried out on signs that are potentially due to vandalism, along with the number of times this sort of maintenance was carried out (this is a count of maintenance transactions). This data is for the last three full calendar years, from January 2014 to December 2016.

This data includes signs of all type on the state highway network. Note that maintenance data in our database does not specify the individual sign identification, so cannot be limited to only town/city name signs.

Please note the following three important caveats:

- The cost amount shown here is based on maintenance cost provided to NZTA by its contractors. Due to the commercially sensitive nature of this information, those figures should be regarded as estimates only.
- The category called "Vandalism" only came into use in mid-December 2015. Prior to this, all vandalism-related maintenance was captured under the other categories listed here.
- While "Graffiti" is vandalism, signs that needed to be realigned or replaced *may* have been vandalised or may have been accidentally damaged. In those cases there is no data on why replacement or realignment was necessary.
- This data is manually entered into NZTA's database by contractors and is subject to human error.

City / Town signs replaced due to theft or vandalism

Replaced signs in NZTA's database include a reason for their replacement. The following table lists the place name signs that have been replaced because they went missing or were damaged in the last six calendar years.

Signs that are replaced because they are missing are likely to have been stolen. Signs that were damaged were in most cases not vandalised but rather were accidentally damaged, but there is no way to quantify this. Vandalism is more likely to be covered under maintenance rather than sign replacement.

Note that if a place name sign went missing but was never replaced, it is not listed here. "WANG/MANA" means Manawatu-Whanganui.
