Subject: RE: ORS Proposed Changes for the short term

Hi David/Kevin

I met with Itree on Wednesday to discuss ORS and have also reviewed the feedback we received from RTF some time ago.

The ORS issues that need to be discussed from a systems perspective, broken down under the three ORS components (CoF, RiD and Offences) and reporting/notifications, are as follows:

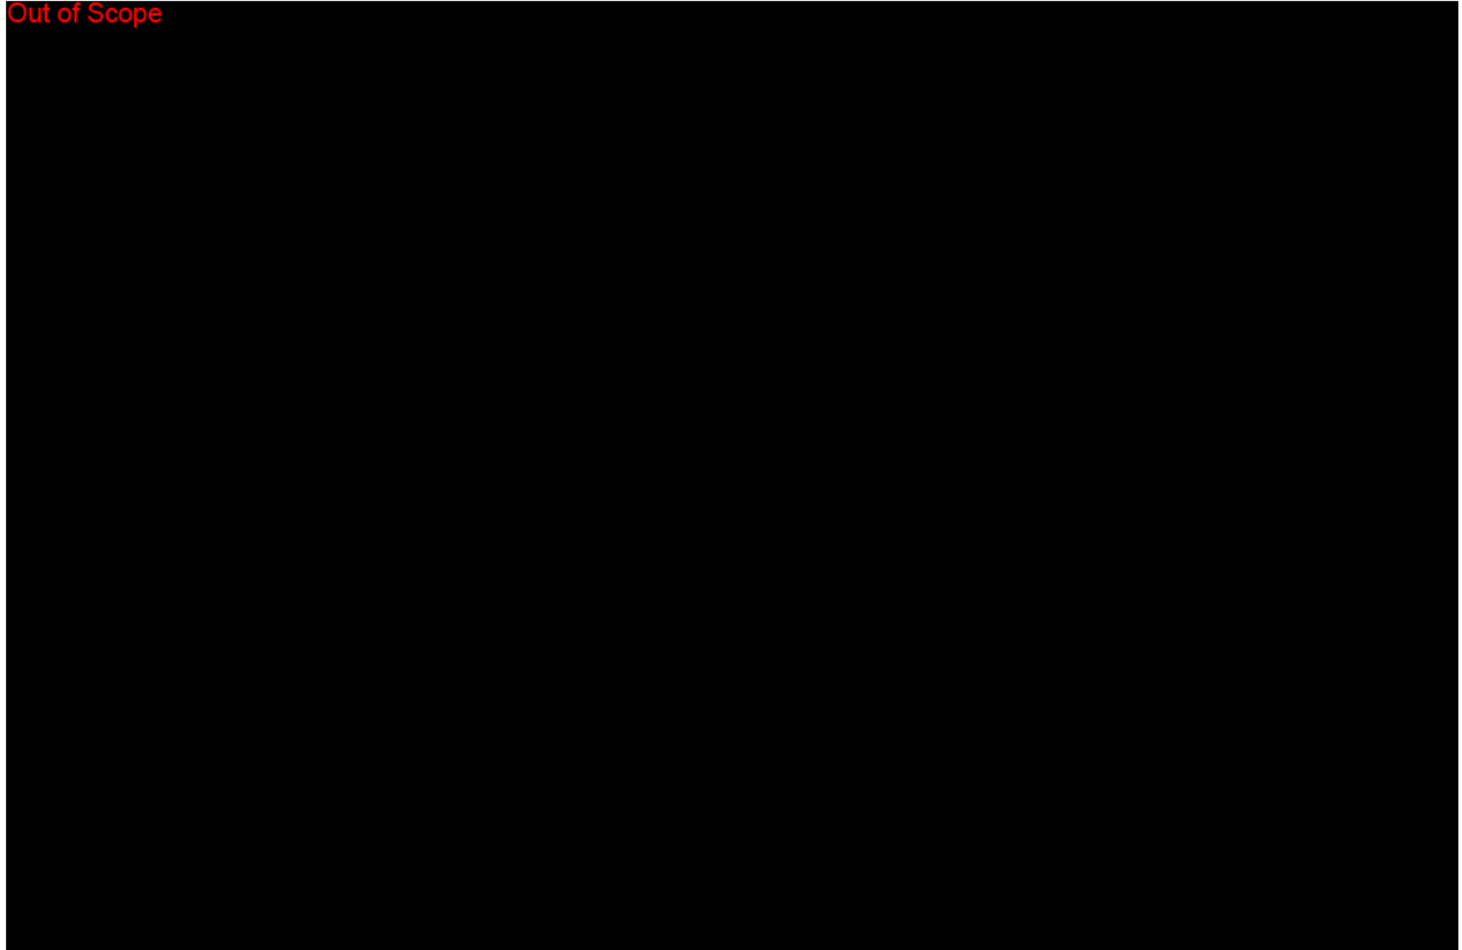

CoF

CoF increasingly less accurate as measure of operator performance as pre CoF has increased % pass rate. Still important as measuring CoF improves CoF pass rates

Look to lower % of ORS rating for CoFs

Out of Scope
