Expiry Year of Credits

Net Available Credits by Month

Import Type ● New ● Used

Caveats

- Data is extracted from Waka Kotahi PEGA applications.
- Credit volumes are reflected in CO2 g/km and are limited to vehicles that have been Accepted by the importer.
- Available Credits refer to credits that have been generated through importation of vehicles and are currently held within a CO2 account and are available for trading or credit offsetting.
- Fleet Average Credits only include credits that have completed settlement. Settlement for Fleet Average accounts occurs at the end of the obligation year in which the vehicles were imported or at the point in which the account ceases to operate as a Fleet Average account.
- Historical reported values are subject to change due to vehicle disputes, data anomalies.
- Net Available Credits by month reflects Credits obtained through settlement less Credits used for Offsetting.
- Expiry year reflects the time in which available credits will expire if not used to offset charges. It is the end of the year shown in which credits expire (31st December).
- New Credits includes settled credits less reversals, disputes and adjustments.
