Expiry Year of Credits

Active Credits by Month

Caveats

- Data is extracted from Waka Kotahi PEGA applications.
- Credit values are limited to vehicles that have been Accepted by the importer.
- Active Credits refer to credits that have been generated through the importation of vehicles and are currently held within a CO2 account and are available for trading or credit offsetting.
- Fleet Average Credits only include credits that have completed settlement.
- Settlement for Fleet average accounts occurs at the end of the obligation year in which the vehicles were imported or at the point in which the account ceases to operate as a Fleet average account.
- Historical values are subject to change due to vehicle disputes, data anomalies.
- Net Active Credits by month reflects Active Credits obtained through settlement less Credit's used for Offsetting.
- Expiry year reflects the time in which active credits will expire if not used to offset charges. It is the end of the year shown in which credits expire (31st December).
