

# PLANS FOR UNSWORTH HEIGHTS

As part of this project, the current local road connections to Upper Harbour Highway (SH18) at Caribbean Drive, Paul Matthews Road and Unsworth Drive will be separated from the new motorway and re-designed. The aim is to connect local roads across or under the motorway, and build a safer, more efficient layout.

## HAVE YOUR SAY... PROPOSAL FOR A NEW UNSWORTH DRIVE BRIDGE

A second bridge is also being investigated from Unsworth Drive over the motorway to Omega Street. The bridge has been proposed to provide an alternative access route into Unsworth Drive when the current one way entry point has to close.

Unsworth Drive used to cater for much more traffic than it sees today, because it originally had full access in and out onto Upper Harbour Highway.

If our ongoing investigations approve this bridge as part of the project, it could provide residents with better connections to and from the North Harbour area.

However, recent traffic modelling investigations have shown that the new connection will increase traffic volume along Unsworth Drive, including potential industrial traffic. A range of traffic calming techniques are being investigated and may need to be included.

## NEXT STEPS

The Transport Agency will not proceed with further plans for the Unsworth Bridge if safety and traffic volume concerns cannot be addressed. A significant amount of work is going into investigating all options. To help inform our investigations, we are committed to consulting with the local community to better understand what this proposed connection could mean for you. Please help us by completing and returning the attached survey by Friday 8 July.
