Subject: FW: Waterview Connection Proposal - Draft Decision

Hi Kim

Thanks for your time this morning.

Here is our comment for the Board of Enquiry regarding the Noise and Vibration report on behalf of St Francis School Board of Trustees.

It states in the report that St Francis Primary School is to get a 2 metre high fence along the southern side of the playing field. This was never discussed with us, and although we really appreciate that they have considered us we would like to be able to have a say in the height/materials of the fence. Currently the wire fence is about 2.5 metres high and we wouldn't want anything lower than this. We have not been advised what materials the fence would be either. We would like to have some consultation around this as to whether it is the best option for the school to drown out noise. Perhaps double glazing the classroom windows would be a better, but we would like to have the option to discuss further on this matter.

Kind regards
Katrina
