Western Ring Route – Waterview Connection Urban and Landscape Design Framework

CONTENTS

Section A Background ............................................................................................................. A-1
A1 Introduction ......................................................................................................................... A-1
A2 Purpose of this Framework ................................................................................................. A-2
A3 Project description .............................................................................................................. A-4
A4 Strategic context ................................................................................................................ A-6
A5 Urban context ..................................................................................................................... A-10

Section B Design vision and principles .................................................................................. B1
B1 Route experience ................................................................................................................ B-1
B2 Design vision ..................................................................................................................... B-2
  B2.1 Urban and landscape design vision ................................................................................ B-2
  B2.2 NZTA urban design objectives ...................................................................................... B-2
  B2.3 Over-arching project principles ................................................................................... B-2
B3 Existing design themes ....................................................................................................... B-2
B4 Design concepts ................................................................................................................ B-3
  B5 Corridor-wide design principles ...................................................................................... B-12
    B5.1 Ecological principles ................................................................................................. B-12
    B5.2 Planting principles .................................................................................................... B-13
    B5.3 Bridge design principles ........................................................................................... B-14
    B5.4 Tunnels, portals, ventilation buildings and stacks design principles ......................... B-14
    B5.5 Noise wall design principles .................................................................................... B-15
    B5.6 Retaining walls design principles ............................................................................. B-20
    B5.7 Highway furniture design principles ........................................................................ B-23

Section C Sector design concepts .......................................................................................... C1
C1 Sector 1 Te Atatu Interchange ............................................................................................. C-3
  C1.1 Henderson Creek ........................................................................................................... C-3
  C1.2 Te Atatu Interchange .................................................................................................... C-7
C2 Sector 2 Whau River .......................................................................................................... C-17
C3 Sector 3 Rosebank – Terrestrial ......................................................................................... C-21
  C3.1 Patiki Road ................................................................................................................... C-21
  C3.2 Rosebank Road .......................................................................................................... C-25
C4 Sector 4 – Reclamation ...................................................................................................... C-31
  C4.1 Traherne Island ............................................................................................................ C-31
  C4.2 Causeway ................................................................................................................... C-35
C5 Sector 5 Great North Road Interchange ............................................................................. C-43
  C5.1 Existing situation ......................................................................................................... C-43
  C5.2 Design concept .......................................................................................................... C-47
C6 Sector 6 SH16 to St Lukes ................................................................................................... C-53
  C6.1 Existing situation ......................................................................................................... C-53
  C6.2 Design concept .......................................................................................................... C-58
C7 Sector 7 Great North Road Underpass .............................................................................. C-61
  C7.1 Existing situation ......................................................................................................... C-61
  C7.2 Design concept .......................................................................................................... C-64
C8 Sector 8 Avondale Heights Tunnel .................................................................................... C-73
  C8.1 Existing situation ......................................................................................................... C-73
  C8.2 Design concept .......................................................................................................... C-79
C9 Sector 9 Alan Wood Reserve ............................................................................................. C-85
  C9.1 Existing situation ......................................................................................................... C-85
  C9.2 Design concept .......................................................................................................... C-91
C10 Sector 10 Maioro Interchange ......................................................................................... C-127
  C10.1 Existing situation ....................................................................................................... C-127
  C10.2 Design concept ......................................................................................................... C-131
List of illustrations

Section A

Figure A-1: Wider context and project route ................................................................. A-1
Figure A-2: Summary of relationship between ULDF and AEE ................................ A-3
Figure A-3: Project sectors .......................................................................................... A-4
Figure A-4: Avondale Blockhouse Bay Area Plan (ACC Future Planning Framework, 2009; http://www.itsmybackyard.co.nz/areaplans/) ........................................ A-7
Figure A-5: Western Bays Area Plan (ACC Future Planning Framework, 2009; http://www.itsmybackyard.co.nz/area) ................................................................. A-7
Figure A-6: Eden Albert Area Plan (ACC FPF 2009) ..................................................... A-8
Figure A-7: Mt Roskill Hillsborough Area Plan (ACC FPF 2009) ................................ A-8
Figure A-8: Star Mill (from Archaeology Peer Review Report) ................................. A-11
Figure A-9: Historic and Heritage Features .............................................................. A-11
Figure A-10: Geology, topography, hydrology .......................................................... A-13
Figure A-11: Community Facilities ......................................................................... A-15
Figure A-12: Character areas (SH20) .......................................................... A-17
Figure A-13: Open space and built form character ................................................ A-19
Figure A-14: Movement network ........................................................................... A-21
Figure A-15: Mt Albert Protected viewshaws – Auckland City Council District Plan A-22

Section B

Figure B-1: Route experience ............................................................................... B-1
Figure B-2: SH16 landscape design concept ........................................................ B-3
Figure B-3: SH16 Design palette: forms, patterns and finishes .............................. B-4
Figure B-4: SH16 Design palette: planting ............................................................ B-5
Figure B-5: SH16 Design palette: materials and textures ..................................... B-6
Figure B-6: SH20 landscape design concept ......................................................... B-7
Figure B-7: SH16 Design palette: form and pattern .............................................. B-8
Figure B-8: SH16 Design palette: planting ......................................................... B-9
Figure B-9: SH16 Design palette: materials ......................................................... B-10
Figure B-10: SH16 Design palette: colour ............................................................. B-11
Figure B-11: Planting Strategy ................................................................................ B-13
Figure B-13: SH20 Noise wall concept – wall type 2 ........................................ B-15
Figure B-12: SH16 Noise wall concept ................................................................. B-15

Figure B-14: SH20 Noise wall concept – wall type 2 ........................................ B-15
Figure B-15: SH20 Noise wall type 1 – plan and elevation ..................................... B-16
Figure B-16: SH20 Noise wall type 1 – long elevations ........................................ B-16
Figure B-17: SH20 Noise wall type 2– long elevations .......................................... B-17
Figure B-18: SH20 Noise wall type 2– panel options ........................................ B-17
Figure B-19: Location and type of noise walls, Sectors 5, 6 and 7 ....................... B-18
Figure B-20: Location and type of noise walls, Sectors 8 and 9 .......................... B-19
Figure B-21: SH16 retaining wall concept ............................................................. B-20
Figure B-22: SH20 retaining wall concept ............................................................. B-21
Figure B-23: SH20 retaining wall profiles ............................................................ B-22
Figure B-24: SH20 materials inspiration .............................................................. B-22
Figure B-25: Artist’s impression of retaining wall, fence, noise walls, lighting and signage gantry – SH16................................................................. B-23
Figure B-26: Visualisation: black finishes to corridor furniture ......................... B-23
Figure B-27: Proposed fencing arrangements – SH16 ........................................ B-24
Figure B-28: Proposed fencing arrangements – SH20 ........................................ B-24

Section C

Figure C-1.1: Project sectors .................................................................................. C-1
Figure C-1.2: Aerial view of sector 1 from the north ............................................... C-3
Figure C-1.3: Looking west from Te Atatu Road .................................................... C-3
Figure C-1.4: Henderson Creek and connecting off-road path .............................. C-3
Figure C-1.5: Mature trees lining the motorway .................................................. C-3
Figure C-1.6: Existing residential dwellings adjacent the corridor ..................... C-3
Figure C-1.7: Existing interface with Jack Colvin Park ........................................... C-3
Figure C-1.8: Sports pitch, clubhouse and seating, Jack Colvin Park ................... C-3
Figure C-1.9: Henderson Creek existing plan .................................................... C-4
Figure C-1.10: Henderson Creek concept plan .................................................. C-5
Figure C-1.13: Northern boundary section at halfway line of main playing pitch C-6
Figure C-1.11: Future cross-section at CH5850 ................................................... C-6
Figure C-1.12: Future cross-section at CH6075 ...................................................... C-6
Figure C-1.14: Northern boundary section at CH5950 ...................................... C-6
Figure C-2.1: Aerial view of sector 2 from the north ................................................................. C-17
Figure C-2.2: Photo 2–1 Existing view to the north adjacent Rosebank Domain on off-road route ... C-17
Figure C-2.3: Photo 2–2 Existing view westwards adjacent to Rosebank Domain .................. C-17
Figure C-2.4: Photo 2–3 Existing view westwards crossing the Whau River on the off-road route ... C-17
Figure C-2.5: Whau River existing plan .................................................................................. C-18
Figure C-2.6: Whau River concept plan .................................................................................. C-19
Figure C-2.7: Concept sketch of future bridge separation at Whau River (View 3) ................. C-20
Figure C-2.8: Engineering arrangement proposals, Whau River bridges .............................. C-20
Figure C-2.9: Concept design, pedestrian and cycle bridge .................................................. C-20
Figure C-2.10: Proposed vehicle safety barrier ................................................................. C-20
Figure C-2.11: Visualisation of view at Rosebank Domain (View 4) ...................................... C-20
Figure C-3.1: Aerial view of Sector 3 from the north ............................................................. C-21
Figure C-3.2: Photo 3–3 Existing view eastwards immediately west of Patiki Road .............. C-21
Figure C-3.3: Photo 3–2 Existing view westwards from Patiki Photo .................................... C-21
Figure C-3.4: Photo 3–1 Existing view eastwards approaching Patiki bridge on off-road route .... C-21
Figure C-3.5: Patiki Road existing plan ............................................................................... C-22
Figure C-3.6: Patiki Road concept plan ............................................................................... C-23
Figure C-3.7: New bridge arrangement over Patiki Road on-ramp ..................................... C-24
Figure C-3.8: New cycleway bridge at Patiki Road. ............................................................. C-24
Figure C-3.9: Photo 3–4 Existing cycleway boardwalk underneath Rosebank off-ramp ... C-25
Figure C-3.10: Photo 3–5 Existing view westbound, between Rosebank ramps .................. C-25
Figure C-3.11: Photo 3–6 Existing view westbound, between Rosebank ramps .................. C-25
Figure C-3.12: Rosebank Road existing plan ...................................................................... C-26
Figure C-3.13: Rosebank Road concept plan ................................................................. C-27
Figure C-3.14: Rosebank Road detail ................................................................................. C-28
Figure C-3.15: Future retaining wall west of Rosebank ramps ........................................... C-28
Figure C-3.16: Enlargement of future cross section at Rosebank off-ramp (section C) ........... C-29
Figure C-3.17: Future cross-section immediately west of Rosebank Road (section B) .......... C-29
Figure C-3.18: Future cross-section at Rosebank off-ramp (section C) .............................. C-29
Figure C-4.1: Photo 4–2 Existing view west departing Taheme Island ................................. C-31
Figure C-4.2: Aerial view of sector 4 from the north ........................................................... C-31
Figure C-4.3: Photo 4–1 Existing view west on Taheme Island ........................................... C-31
Figure C-4.4: Sector 4.2 existing plan .................................................................................. C-32
Figure C-4.5: Sector 4-1 concept plan .................................................................................. C-33
Figure C-4.6: Future cross-section at Traherne Island compared to existing arrangement (Section D) ... C-34
Figure C-4.7: Photo 4–3 Existing view eastwards approaching Rosebank bridge ..................... C-35
Figure C-4.8: Photo 4–4 Existing view westwards after Rosebank bridge ................................ C-35
Figure C-4.9: Photo 4–5 Existing view westwards after Rosebank bridge .............................. C-35
Figure C-4.10: Sector 4.2 existing plan ................................................................. C-36
Figure C-4.11: Sector 4.2 concept plan ................................................................. C-37
Figure C-4.12: Visual simulation of proposed view east approaching Rosebank bridge (View 5) .... C-38
Figure C-4.13: Photo 4–6 Existing view west approaching Rosebank bridge on the off-road route ....... C-39
Figure C-4.14: Photo 4–7 Existing view west on Rosebank bridge ........................................ C-39
Figure C-4.15: Photo 4–8 Existing view to Rosebank Bridge from Eric Armishaw Park .............. C-39
Figure C-4.16: Sector 4.3 existing plan ................................................................. C-40
Figure C-4.17: Sector 4.3 concept plan ................................................................. C-41
Figure C-4.18: Future pedestrian and cycle bridge detailing ................................................. C-42
Figure C-4.19: Visual simulation of proposed view west approaching Rosebank bridge (View 6) .... C-42
Figure C-4.20: Concept sketch of future view to north-west from Waterview (View 7) ............... C-42
Figure C-5.1: Photo 5–1 View towards the proposed Great North Road interchange from Eric Armishaw Reserve ......................... C-43
Figure C-5.2: Sector 5 existing plan ........................................................................ C-44
Figure C-5.3: Photo 5–2 View towards Great North Road interchange from the end of Maryland Street ......................................................... C-45
Figure C-5.4: Photo 5–3 Elevated view of Great North Road interchange from Alberta Street ....... C-45
Figure C-5.5: Sector 5 concept plan ........................................................................ C-46
Figure C-5.6: Sector 5 future sections A-A ...................................................................... C-48
Figure C-5.7: Sector 5 future sections B-B ...................................................................... C-48
Figure C-5.8: Sector 5 future sections CH500: Waterview Park ........................................ C-49
Figure C-5.9: Sector 5 future sections CH500: Waterview Park ........................................ C-49
Figure C-5.10: Oakley Creek landscape concept plan ..................................................... C-50
Figure C-5.11: Oakley Creek concept sections ............................................................ C-51
Figure C-5.12: Concept for flyovers at Great North Road Interchange ............................... C-52
Figure C-6.1: Photo 6–1 View west along SH16 .............................................................. C-53
Figure C-6.2: Photo 6–2 View east along SH16 from Carrington Road bridge ................. C-53
Figure C-6.3: Photo 6–3 Carrington Road, where the cycleway links from Sutherland Road ... C-53
Figure C-6.4: Sector 6(i) existing plan ................................................................. C-54
Figure C-6.5: Waterview to St Lukes – concept plan (western section) ......................... C-55
Figure C-6.6: Sector 6(ii) existing plan ................................................................. C-56
Figure C-6.7: Waterview to St Lukes - concept plan (eastern section) ......................... C-57
Figure C-6.8: Typical noise wall elevations, Sector 6 ................................................ C-58
Figure C-7.1: Sector 7 existing plan ........................................................................ C-62
Figure C-7.2: Photo 7–1 View from Waterview Primary School north towards proposed interchange ....................................................... C-63
Figure C-7.3: Photo 7–4 Six metre high waterfall on Oakley Creek .................................... C-63
Figure C-7.4: Photo 7–3 View from Herdman Street towards Waterview Primary School ........ C-63
Figure C-7.5: Photo 7–2 Oakley Creek walkway, showing recent revegetation planting and pathway works .................................................. C-63
Figure C-7.6: Photo 7–5 Saxon Reserve ..................................................................... C-63
Figure C-7.7: Artist’s impression of ventilation building and stack – Great North Road option (Concept Option A) ................................. C-64
Figure C-7.8: Ventilation building – location plan (Concept Option B) ............................ C-65
Figure C-7.9: Ventilation building – Great North Road (Concept Option A); basement level ........ C-66
Figure C-7.10: Ventilation building – Great North Road (Concept Option A); ground level plan .... C-67
Figure C-7.11: Ventilation building – Option A; cross section ........................................ C-67
Figure C-7.12: Ventilation building – Oakley Reserve location plan (Concept Option B) ........ C-68
Figure C-7.13: Ventilation building – Concept Option B plans: Fan Room level and Service level .... C-69
Figure C-7.14: Ventilation building – Concept Option B long section ............................. C-69
Figure C-7.15: Oakley Bridge – location and concept plan ........................................ C-70
Figure C-7.16: Oakley Bridge – 3D views showing possible future form and setting in the landscape .............................................................................. C-71
Figure C-7.17: Saxon Reserve - existing plan ........................................................ C-72
Figure C-7.18: Saxon Reserve - concept plan ........................................................ C-72
Figure C-8.1: Photo 8–1 expansive views over Heron Park towards the Waitakere ranges………C-75
Figure C-8.2: Photo 8–2 Access from Oakley Creek to Great North Road and
Heron Park is narrow with limited surveillance………………………………………………C-75
Figure C-8.3: Photo 8–3 Phylis Reserve is a large grassed active recreation
reserve built on a former landfill site…………………………………………………………C-75
Figure C-8.4: Photo 8–4 The existing pathway network through Phylis Reserve is
narrow and suffering from erosion in places………………………………………………C-75
Figure C-8.5: Phylis Reserve existing plan……………………………………………………..C-76
Figure C-8.6: Phylis Reserve – Concept Option A ……………………………………………C-77
Figure C-8.7: Phylis Reserve – Concept Option B (Council preferred option) …………………C-78
Figure C-8.10: Phylis pedestrian bridge concept –elevation………………………………….C-80
Figure C-8.8: View 1, looking west from Phylis Reserve………………………………………C-80
Figure C-8.9: View 2, looking west along the bridge…………………………………………C-80
Figure C-8.11: View 3, looking up from Oakley Creek………………………………………..C-80
Figure C-8.12: Harbutt Reserve existing plan…………………………………………………C-81
Figure C-8.13: Photo 8–5 Harbett Reserve suffers from a lack of connectivity and passive surveillance……………………………………………………………C-81
Figure C-8.14: Photo 8–6 The western rail line looking towards Mt Albert Pak n Save …………C-81
Figure C-8.15: Photo 8–7 View over the western rail line towards the proposed Soljak Place Overbridge……………………………………………………………..C-81
Figure C-8.16: Harbutt Reserve concept plan………………………………………………….C-82
Figure C-8.18: Soljak Pedestrian Bridge – future view 2 along Soljak Place…………………..C-83
Figure C-8.17: Soljak Pedestrian Bridge – future view 1 north over rail line …………………C-83
Figure C-8.19: Soljak Pedestrian Bridge – future view 3 south through Harbutt Reserve……C-83
Figure C-9.1: Photo 9–1 Hendon Avenue looking towards the Stewart Road intersection ……..C-85
Figure C-9.2: Photo 9–2 View looking south along Olympus Place towards Alan Wood Reserve …C-86
Figure C-9.4: Photo 9–4 View south over Alan Wood Reserve towards Mount Albert
(proposed Olympus Bridge location)……………………………………………………………C-86
Figure C-9.5: Photo 9–5 View west over leased Council playing field on NZTA
land bordering Hendon Park……………………………………………………………………C-86
Figure C-9.3: Photo 9–3 Existing training field at Alan Wood Reserve …………………………C-86
Figure C-9.6: Photo 9–6 Alan Wood Reserve looking west along proposed motorway alignment …C-87
Figure C-9.8: Photo 9–8 Existing Stoddard Road shopping centre looking up
Richardson Road towards proposed bridge…………………………………………………C-87
Figure C-9.9: Photo 9–9 View east from proposed Richardson Road bridge location……………C-87
Figure C-9.7: Photo 9–7 View down Richardson Road towards Stoddard
Road shops (proposed Richardson Road bridge location)…………………………………C-87
Figure C-9.10: Alan Wood Reserve existing plan………………………………………………C-88
Figure C-9.11: Option A Alan Wood Reserve concept plan with buried ventilation building………C-89
Figure C-9.12: Option A2 Alan Wood Reserve concept plan with
above-ground ventilation building……………………………………………………………C-91
Figure C-9.13: Option B Alan Wood Reserve concept plan - longer term partnership option …C-92
Figure C-9.14: Alan Wood Reserve – key map for sections……………………………………C-93
Figure C-9.15: Alan Wood Reserve – future section @ chainage 700 ……………………………C-94
Figure C-9.16: Alan Wood Reserve – future section @chainage 1100 ……………………………C-95
Figure C-9.17: Alan Wood Reserve – future section @ chainage 1200 …………………………..C-96
Figure C-9.18: Alan Wood Reserve – future section @ chainage 1300 …………………………..C-97
Figure C-9.19: Alan Wood Reserve – future section @ chainage 1400 …………………………..C-98
Figure C-9.20: Alan Wood Reserve – future section @ chainage 1500 …………………………..C-99
Figure C-9.21: Alan Wood Reserve – future section @ chainage 1600 …………………………..C-100
Figure C-9.22: Alan Wood Reserve – future section @ chainage 1700 …………………………..C-101
Figure C-9.23: Former Goldstar site proposed concept design…………………………………C-102
Figure C-9.24: Southern portal approach Concept Option A – artist’s impression looking north. C-103
Figure C-9.25: Southern ventilation stack context………………………………………………C-104
Figure C-9.26: Southern ventilation building Concept Option A – location plan………………C-104
Figure C-9.27: Southern ventilation building Concept Option A – floor plan…………………..C-105
Figure C-9.28: Southern ventilation building Concept Option A – long sections………………C-106
Figure C-9.29: Southern ventilation building Concept Option A – cross section………………C-107
Figure C-9.30: Southern Ventilation Building Concept Option B – location plan………………C-108
Figure C-9.31: Southern Ventilation Building Concept Option B – visual simulation
view 1 from Alan Wood Reserve………………………………………………………………C-109
Figure C-9.32: Southern Ventilation Building Concept Option B – visual simulation
view 2 from the Avondale Motorpark…………………………………………………………C-110
Figure C-9.33: Southern Ventilation Building Concept Option B – visual simulation
view 3 from Hendon Park walkway…………………………………………………………C-111
Figure C-9.35: Olympus Pedestrian Bridge – concept elevation………………………………C-112
Figure C-9.34: Olympus Pedestrian Bridge – concept plan……………………………………C-112
Figure C-9.36: Olympus Pedestrian Bridge – artist’s impressions………………………………C-113
