Asphalting of car parks in Arthur St tonight

- Thursday 24 April
- 3.00pm – 11.00pm, weather permitting

Asphalting scheduled for the car parks in Arthur St today will bring the upgrading of the southern side of the street close to completion. Asphalting is noisy work but we will be as quiet as possible. Thank you for your patience while this work is underway.

The past few days have seen planting of pohutukawas and native grasses around the parking area. Still to come are stone setts to be placed in the rectangular areas beside the tree plantings. The surfaces there are currently protected with a thin layer of asphalt.

Traffic signs will also be erected. Installation of sumps on the northern side of Arthur Street is nearly complete.

Other work
Line marking of the recently asphalted areas along Arthur St and Karo Drive (State Highway 1) will take place early next week at night. This is quiet work and should not cause a disturbance.
