

Rocks Road Roadworks

WORKS UPDATE

16 March 2018

Construction of the new road surface continued this week, with the completion of the base layers. This work involves digging out and backfilling soft ground areas and laying 180mm of asphalt. This work is probably the most disruptive to people who have to travel along Rocks Road. Thanks to everyone for their patience and understanding. The good news is the project is not far off being finished.

Crews have also been working on adjusting the drainage systems to the new road height, as well as repairs to the seawall and footpath.

Over the next few weeks crews will be backfilling the area behind kerbs, completing concrete works and adjusting the existing guardrail.

The final asphalt surface will not be completed until all of the additional works are done. As an interim measure a temporary centre line will be painted to guide traffic through the site until the final surface is complete. Once this is done, new road markings can be painted, including cycle lanes.

Boxing ready for concrete to be poured as part of the seawall repairs at Magazine Point.

Completion of the dig out of soft area at Magazine Point.

The milling machine in action, feeding out cut material into the truck.

Thank you from the Transport Agency

February's king tides and cyclone caused considerable damage along Rocks Road, and the work to repair the seawall and footpath, and build a new road is considerable. Whether your journey is by bike, on foot, or in a vehicle, please be patient and take extra care for your safety and that of our crews.

Our continued thanks for everyone's patience and understanding while we do this important work in your community. If you have any questions please contact:
