

Harewood Road

The Harewood Road Roundabout will be larger and will include two lanes at least in all directions. This will allow traffic to flow more freely through the intersection and will allow northbound traffic from the airport to have better access onto Russley Road.

A cycle underpass will be constructed under the Harewood Road Roundabout and a new cycle lane will be included on the airport side of Harewood Road. The crossing points/islands for pedestrians and cyclists will be retained.

A roundabout at the intersection of Harewood and Orchard Roads will improve safety by replacing the existing sharp corner.

Proposed Harewood Road layout

This panel shows the changes to the Russley Road (SH1) / Harewood Road Roundabout
