

SH1 Timaru to St Andrews

Safety improvements

Revised project map

This map shows high-level design recommendations and is subject to funding, timing, consenting and property processes.

Road improvements may include:

- Road widening and shoulder strengthening as appropriate
- Intersection upgrades as required, including new or improved right-turn bays
- Pavement repairs followed by a new coat of chipseal
- New line markings painted as 1.5m wide centreline (without median barrier)
- Installation of rumble strips audio tactile profiled (ATP) road markings.

Speed limits

Assessing speed limits on this section of highway will be subject to the new Land Transport Rule, currently in development.
