

HAYWARDS INTERCHANGE

HOW TO GET AROUND

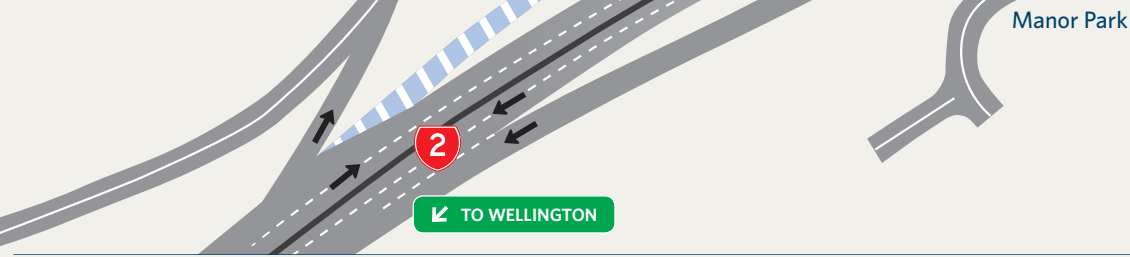

A HOW TO GUIDE

We're about to switch traffic onto the new Haywards interchange.

If you're driving straight through on State Highway 2, the main change you'll notice is that there are no more traffic signals. Please stay in the right-hand lane where possible, to allow those accessing State Highway 58 to use the new off-ramps.

If you're driving north on State Highway 2, from Wellington, and want to head onto State Highway 58, you'll need to take a temporary off-ramp on your left which then joins the new roundabout. This layout is needed while the construction team finishes work in this area, and it'll change to a standard layout over the coming months.

If you're driving towards Wellington on State Highway 2 from Upper Hutt, and want access either Manor Park or State Highway 58, you'll take the off-ramp on your left. Turn left to Manor Park or follow around to the right to State Highway 58.

If you're driving on State Highway 58, you'll use the new roundabout to go left to head north on State Highway 2 towards Upper Hutt, or take the second exit on the roundabout to access Manor Park. To head south towards Wellington, continue around the roundabout to the right.

The separated cycle paths will be opening in June, so if you're on a bike, you'll need to travel through the interchange the same way you do at Dowse for the moment. If you're wanting to get on or off State Highway 58, just use the off-ramps and roundabout.

While the interchange layout is new please be patient. There'll be plenty of signage to guide you and a lower speed limit will be in place to allow everyone to get used to the new layout.

For more information, please visit www.nzta.govt.nz/haywards, or call the project team on **0800 007 425**.
