

Making the road between Blenheim and Nelson safer

19 people dead, 90 seriously injured*

*Between 2008 and 2017

*They're whānau,
mates, neighbours
and friends.*

Something has to change.

Most of these people were killed or injured in crashes where drivers ran off the road and hit trees, poles or deep drains.

There are changes we can make to the road to prevent more crashes like these, but to get it right we need your help.

As a local, you know your road better than anyone. We'll work with you to make safety improvements that fit with the way you use the road.

It's about making sure simple mistakes don't cost lives.
