

SOUTHWEST GATEWAY: KAITIAKITANGA

Southwest Auckland is an area of high cultural value and we are working with Mana Whenua to better understand these values and how we can protect them. We are committed to managing environmental effects on the local area including waterways and stormwater and where possible enhancing the existing environment.

Various environmental considerations, such as the crossings of the coastal marine area and impacts on ecology, archaeological, heritage and cultural sites have been considered during the development of the projects and will continue to be a part of the consideration for the eventual preferred option.
