

Who we are and what we do

Together, the experienced TEL team have worked hard to deliver the Bay's largest ever roading project.

The NZ Transport Agency

The NZ Transport Agency is a Crown agency responsible for contributing to an affordable, integrated, safe, responsive and sustainable land transport system.

The Transport Agency Bay of Plenty is responsible for the maintenance, operations and construction of the state highways from Waihi to Te Kaha and south of Rotorua. The main state highways that fall within this area are State Highway 2, 5, 29, 30, 33, 35, 34, 36 and 38. There are a number of Transport Agency funded projects planned for the future that will help towards creating a safer and more efficient state highway network for the Bay of Plenty; the Tauranga Eastern Link is one of these projects.

Fulton Hogan HEB Construction Alliance

The Fulton Hogan HEB Construction Alliance is a collaboration of two companies who have delivered the Tauranga Eastern Link project. Each company brought a vast amount of experience to the Design and Construction contract, with experience in major construction projects both locally and nationally.

Construction

The head contractor for the project is Fulton Hogan, who teamed up with HEB Construction as their construction partner. These two companies jointly undertook the construction which included earthworks, ground improvements, drainage, structures and pavements. Staff from both companies made up the environmental, survey, stakeholder, quality, health and safety and administration teams.

Design

The design alliance was led by URS Corporation and Opus International Consultants. Together designed the structures, earthworks, lighting, geometrics and drainage. Specialist support was supplied by Gaia for the geotechnical design, and Bartley Consultants for the road pavement design.

Beca

Beca offers a variety of consultancy services from engineering, architecture and planning services, to project, cost management, software technology and valuation services.

Beca has been involved in the Tauranga Eastern Link project from the outset, and is pleased to be Principal's agent for the NZ Transport Agency on the project. From input into the development and planning, to future-proofing the designs, from geotechnical investigations to traffic modelling, they know every inch of the Tauranga Eastern Link route. Beca are proud to have contributed to the Tauranga Eastern Link story.
