

SH2 programme selection

Six corridor programme options were developed and tested. The preferred programme was selected based on the following criteria:

- Performance against investment objectives
- Value for money and affordability
- Risks associated with each programme, including:
 - constructability - can it be built?
 - environmental impacts
 - property and land requirements
 - reputation and community impacts
 - cultural and heritage issues
 - any secondary benefits e.g. improvements in alternative routes and local community access.
