Major changes to CoPTTM are currently notified through the TAN system and all other changes are notified on the CoPTTM pages of the NZTA website.

There have been numerous complaints that this approach has led to changes being made to the CoPTTM without users being made aware of those changes. As a result, the NZTA has decided to operate a notification system for changes to the CoPTTM.

From November 2018, all changes to the CoPTTM (and items of interest to the temporary traffic management industry) will be notified to interested parties who have subscribed to [CoPTTM.Notify](#).

Examples of upcoming changes to CoPTTM (and items of interest) that will be notified via the service are:

- Decisions on CoPTTM consult submissions
- Changes to CoPTTM as a result of the CoPTTM consult decisions
- Introduction of the training and competency model
- NZTA specialist temporary traffic management workshops

The following people should consider subscribing to receive CoPTTM updates:

- Anyone who has an interest in temporary traffic management
- Planners involved in developing traffic management plans for the installation, maintenance and removal of temporary traffic management
- Managers of temporary traffic management crews
- Owners/directors of companies completing work involving temporary traffic management.
