

Section I-12 Standard TMP for Waterview Tunnel

Closure of lane(s) to carry out incident response or other short-term activities

September 2016

Standard TMP for Waterview Tunnel

Introduction

This standard TMP for the Waterview tunnel has been developed by the New Zealand Transport Agency in conjunction with the Operations and Maintenance alliance (OAMA).

It covers the closure of a lane or lanes to carry out incident response or other short-term activities (eg deliver workers to a service area).

Using this Standard TMP

Take the following steps to use this standard plan:

- download the standard TMP
- complete the content with pertinent particulars where indicated by blue writing with yellow highlighter (add relevant dates for the year of operation)
- submit the TMP to the road controlling authority for approval (resubmit every year for approval)
- carry the approved TMP while completing the work
- retain approved TMP for one year after expiry

Updates to this Standard TMP

The nature of a code of practice for temporary traffic management is that its contents are reviewed in the light of best practice.

If any individual observes an event or hears a comment that raises concerns that this standard TMP is not best practice, contact the:
