

# COVID-19 Transport Impact: NZ in Alert Level 3

Survey Period: 30<sup>th</sup> April - 10<sup>th</sup> May

COVID-19 is having an immense impact on travel behaviour. This report is from a new weekly tracker which will help us understand how travel behaviour and attitudes to travel are changing in this evolving environment. Knowledge from this research will allow us to understand and respond in a timely manner with insights for current operational choices and future recovery stages.

## Travel Behaviour Segmentation
