To whom it may concern

Dear Sir/Madam

Supply of MASH Road Safety Hardware

Waka Kotahi is aware that the supply of road safety hardware to the NZ market is coming under pressure from global logistics constraints. This may affect the ability of System Suppliers and System Installers to meet contracted agreements to supply MASH compliant road safety hardware for new construction and maintenance projects.

System Installers may request dispensation to substitute MASH end terminals with NCHRP 350 end terminals only where supply of MASH products is not available from any NZ supplier. The supply issue must be confirmed by the System Installer in writing (email is acceptable), following contact with the NZ suppliers (including but not limited to CSP Pacific, Ingal Civil and Steelgal).

This dispensation must be sought from the Waka Kotahi Project Manager (for NOC contracts the Project Manager may be the Contract Manager) and recorded in the contract's quality assurance records.

Yours sincerely

James Hughes
