Overview

Summary

The purpose of this document is to report on the monthly changes in traffic volumes on state highway. This report also covers annual state highway traffic trends for the period of 1989 to 2010.

The overall trend in state highway traffic growth for all and heavy vehicles, up to 2005, have continued to increase. But both indexes have seen fluctuations on their increasing trend since 2006.

In August 2011, compared with August 2010, the monthly average daily traffic (MADT) for all vehicles remained almost the same, while the MADT for heavy vehicles increased by 3.1%.

Technical Notes

What is MADT and AADT

Monthly Average Daily Traffic (MADT) is the average of daily traffic volume measured in a given month.

A more commonly reported statistical term is Annual Average Daily Traffic (AADT), which measures the average of daily traffic volume over a given calendar year.

Purpose

Monthly Average Daily Traffic (MADT) reporting enables us to provide a month-by-month indication of traffic trends, and to allow the effects of specific events (e.g. storms, fuel price shifts, economy, etc.) to be monitored.

Sample coverage

There are 104 telemetry¹ sites in use on the state highway network to provide this traffic data.

The table below shows the number of sites in each NZ Transport Agency region. These numbers represent the sample sizes that are used to report the regional MADT results.

NZ Transport Agency Region	Number of Telemetry Sites
Northland and Auckland	19
Waikato and Bay of Plenty	23
Taranaki, Manawatu-Wanganui, Hawkes Bay and Gisborne	16
Wellington, Nelson, Marlborough and Tasman	16
Canterbury and West Coast	14
Otago and Southland	16

Sources of variation in MADT

The number of weekends in a specific month can affect the MADT comparison between years. Also, public holidays that can occur in different months can also affect the ability for direct comparison between years. This report does not attempt to compensate for these variations.

¹ Telemetry sites are continuously monitored 24/7.

Key Results

The State Highway Traffic Volume Indexed growth measures the change in traffic volume compared to 1989.

Overall

Over the last 10 years, the average annual growth for all vehicles using the State Highway network is approximately 1.5%, and approximately 3% for heavy vehicles.

The all vehicle index shows no significant change for the past five years. The heavy vehicle index has fluctuated for the past five years, but shows an average monthly growth of approximately 3% over the past 12 months when compared to the same month in the previous year. This is in line with the average annual growth of approximately 3% over the past 10 years.

After experiencing the first significant reduction of heavy vehicle volumes in 2009, for the last two decades, 2010 has seen the index for heavy vehicles using the State Highway network increase.

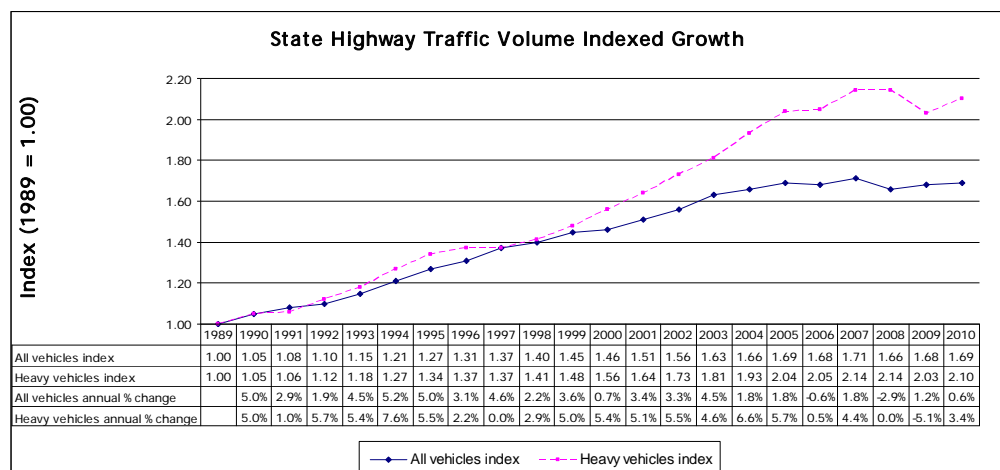

2010 All Vehicles

In 2010, there has been an increase of approximately 0.6% in the total number of vehicles using the State Highway network, compared to 2009.

2010 Heavy Vehicles

There has been an increase of approximately 3.4% in the total number of heavy vehicles using the State Highway network, compared to 2009.

The percentage of very long heavy vehicles (>17m) increased by approximately 6%, compared to 2009.

**Results:
Monthly
traffic at key
sites**

Five key sites have been selected to represent five main centres in NZ.

The MADT values for August 2011, August 2010 and percentage of difference compared are reported in the table below.

Note the MADT values include all vehicles.

Site	City	MADT (All Vehicles) August-10	MADT (All Vehicles) August-11	% Change
Auckland harbour bridge (SH1)	Auckland	153264	153073	0%
Greenwood (SH1)	Hamilton	21436	22228	4%
Pukerua Bay (Alternate site)	Wellington	22427	21921	-2.3%
Waimakariri Bridge	Christchurch	36952	37247	1%
Burnside	Dunedin	26028	25275	-3%

In August 2011, the MADT values for the site representing Hamilton and Christchurch indicated an increase; Auckland remained at the same level, while Wellington and Dunedin showed a decrease, compared to the same period in the previous year.

Please note:

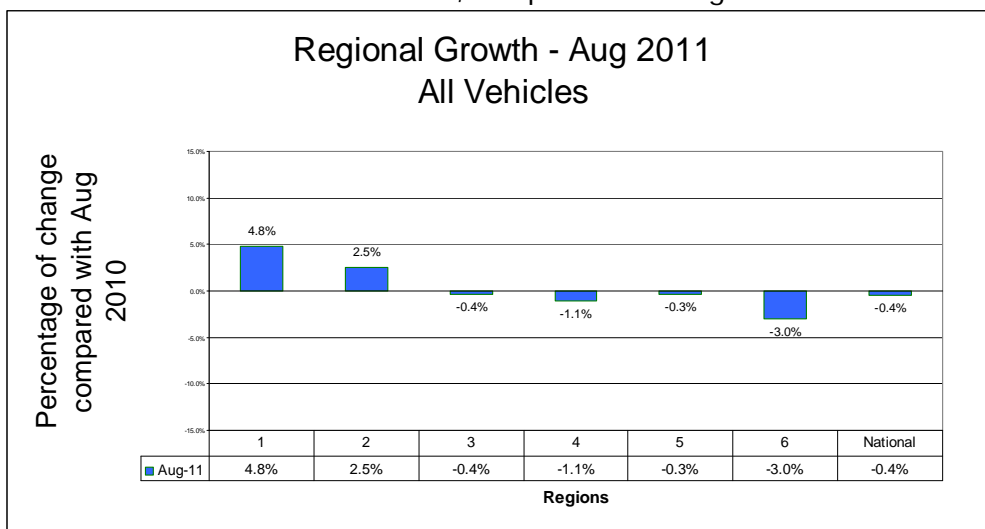

The required accuracy for the delivery of data at a single site is +/- 5%, so the above figures may be within this tolerance.

Results: All Vehicles

Regions

Comparisons across the NZ Transport Agency regions have also been carried out.

The graph below shows the percentage of difference compared with the same period in 2010. The MADT values here represent all vehicle types. It can be observed that region 1 and 2 indicated an increase, and the rest of the regions showed a decrease. Nationally, the MADT in August 2011 for all vehicles remained almost the same, compared with August 2010.

NZTA Region Number	NZTA Region
1	Northland and Auckland
2	Waikato and Bay of Plenty
3	Taranaki, Manawatu-Wanganui, Hawkes Bay and Gisborne
4	Wellington, Nelson, Marlborough and Tasman
5	Canterbury and West Coast
6	Otago and Southland

Regional MADT Growth (All vehicles) – Sum of weighted MADT (All vehicles) percentage change compared with the same month previous year from each telemetry site in a region.

National MADT Growth (All vehicles) – Average of MADT (All vehicles) percentage change compared with the same month previous year from all telemetry sites (not weighted).

More graphs

The graphs (as above) dated back to January 2007 are attached to this report.

All sites

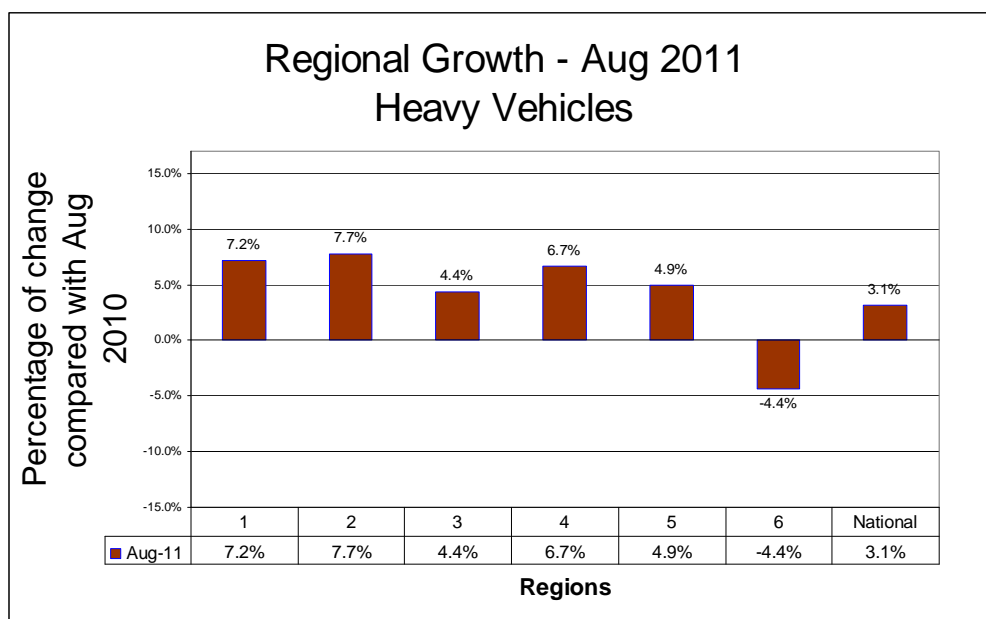

A table of MADT (all vehicles) values for all national telemetry sites is attached to this report.

Results: Heavy Vehicles

Regions

Comparisons across the NZ Transport Agency regions have also been carried out, focusing on heavy vehicles¹.

The graph below shows the percentage of difference compared with the same period in 2010. The MADT values here represent heavy vehicles only. It can be observed that almost all regions had an increase, except region 6 showed a decrease. Nationally, the MADT in August 2011 for heavy vehicles increased by 3.1%, compared with August 2010.

NZTA Region Number	NZTA Region
1	Northland and Auckland
2	Waikato and Bay of Plenty
3	Taranaki, Manawatu-Wanganui, Hawkes Bay and Gisborne
4	Wellington, Nelson, Marlborough and Tasman
5	Canterbury and West Coast
6	Otago and Southland

Regional MADT Growth (Heavy vehicles) – Sum of weighted MADT (Heavy vehicles) percentage change compared with the same month previous year from each telemetry site in a region.

National MADT Growth (Heavy vehicles) – Average of MADT (Heavy vehicles) percentage change compared with the same month previous year from all telemetry sites (not weighted).

More graphs

The graphs (as above) dated back to January 2007 are attached to this report.

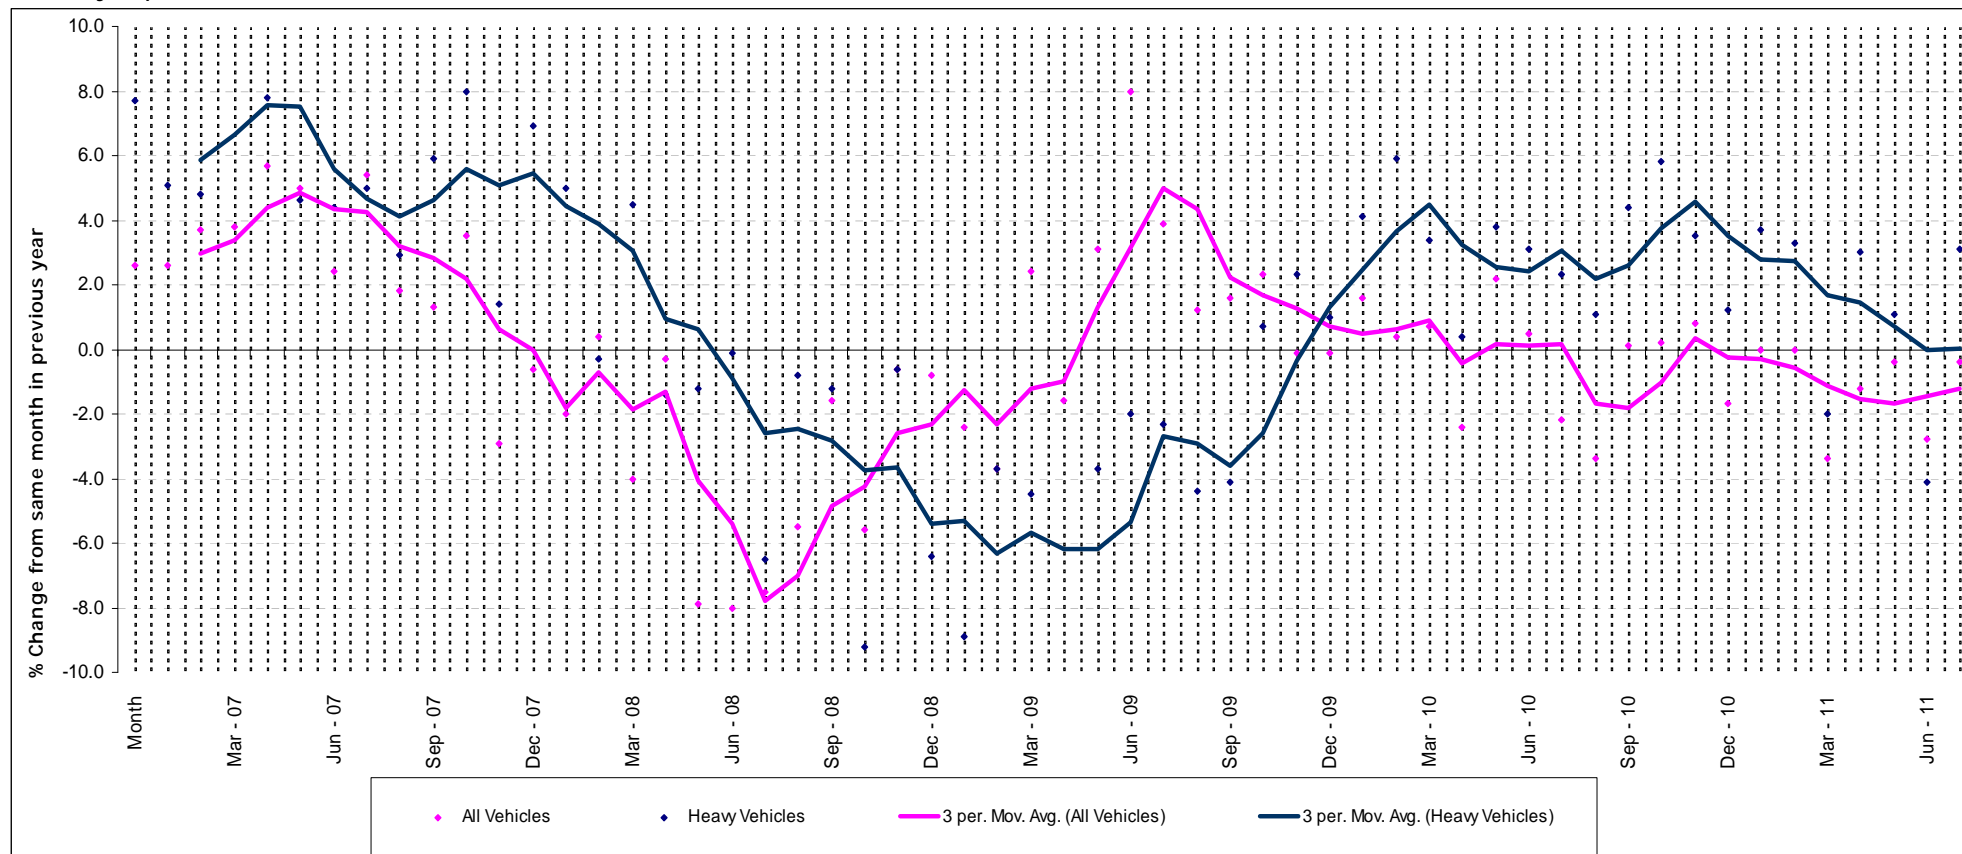

All sites

A table of MADT (heavy vehicles) values for all national telemetry sites for 2010 is attached to this report.

¹ Heavy vehicles are those with a gross vehicle mass exceeding 3.5 tonnes.

Summary of Percentage Change from Same Month in Previous Year

The graph and table below shows 5 years national percentage change from same month in previous year, summarising the figures published in previous monthly reports.
